Energy cup Instruction

1.Principle

Energy Cup scan and detect the items (such as water,medicine ,food,etc)through light waves and magnetic field analysis,and then analysis the energy and magnetic field data which item itself exists.
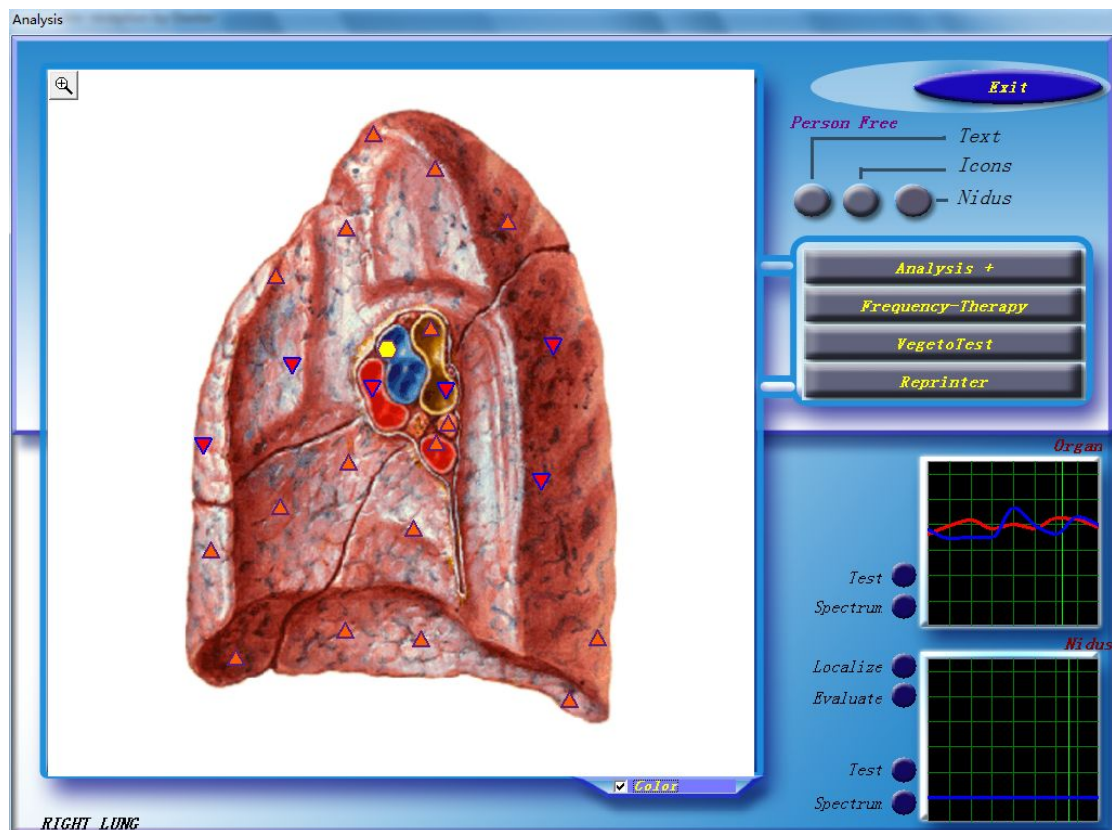

2. Effect

Analysis the energy which item itself exists through wave and magnetic and the magnetic field data then in combination with human test data within 3D-NLS software can effectively draw a human body to adapt to,absorb,fitment.
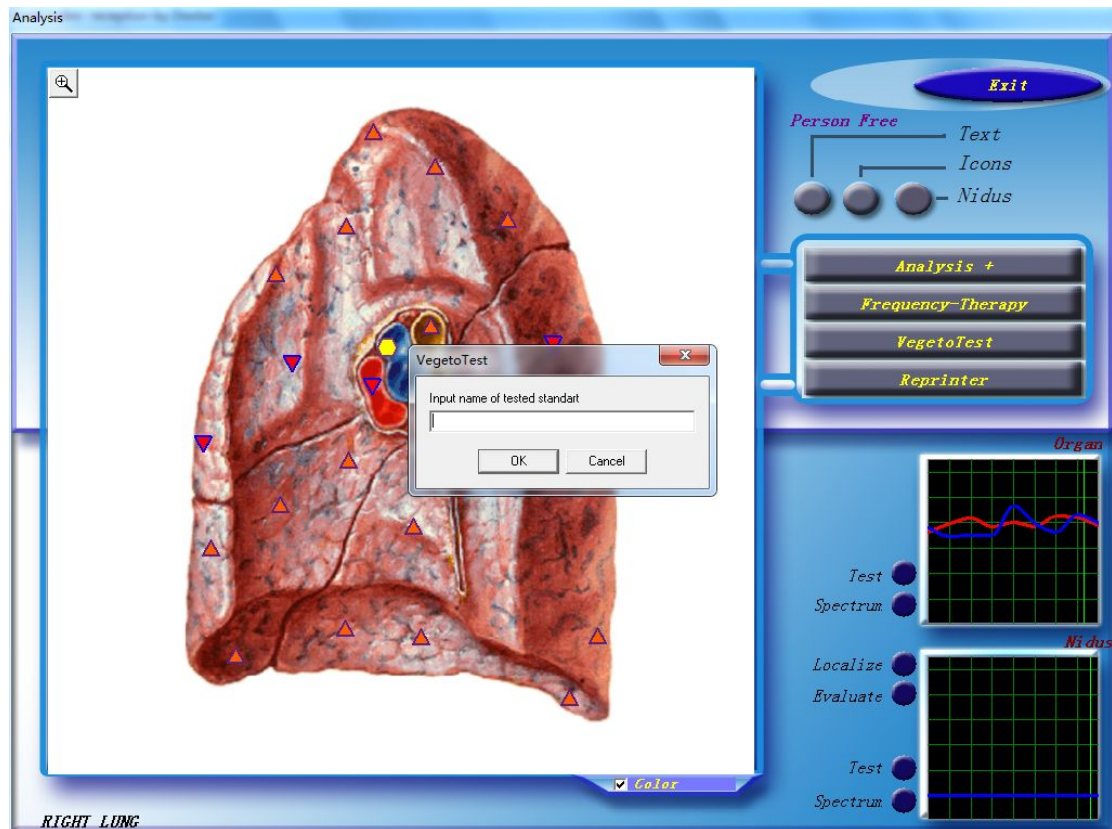

3.Use
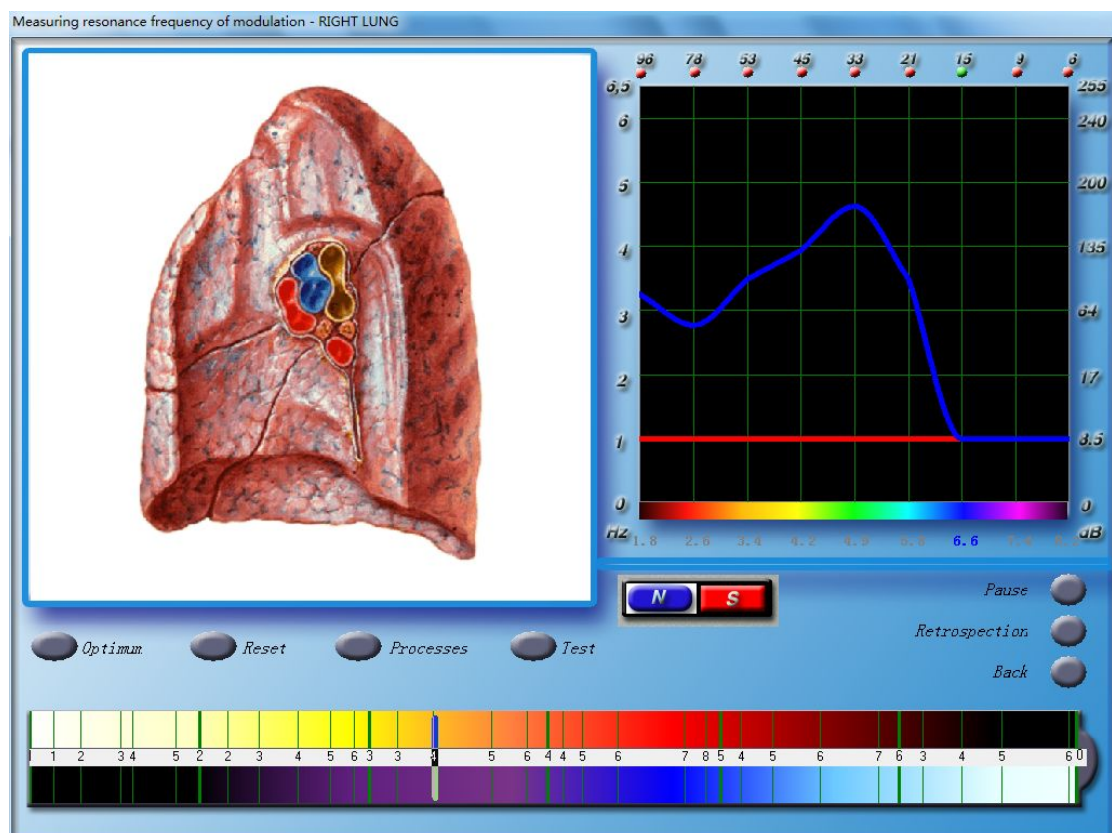

- Energy connect to the 3D-NLS host

Software enter the interface of the energy cup

- Put the tested items (such as water ,medicine,ect) into the disposable cups.

- Operating the software testing and input the item name.

- Operating the software

- Get the results
